Lullaby

Always beside me

The day you were born, outside there was a reindeer
knowing a secret, watching his mom near
So perfect, just perfect, that baby that cries
under the sky with the northern lights

Hush my little innocent, lullaby and sleep tight
A cheek like a peach, the eyes like a starlight
Under the sky with the pink of the dawn
my love, you'll cry, many times more

**Sleep my little precious, right there beside me, oh I will shelter you
Sleep my little precious, always beside me, this moment is ours, it's blue**

The wonders of Lapland, eight seasons, you own
The colors of fall, the flowers of snow
The arms of the fells keep you safe, the wind too
The midnight sun, through the polar nights it will bring you

**Sleep my little precious, right there beside me, oh I will shelter you
Sleep my little precious, always beside me, this moment is ours, it's blue**

Oh and whenever you look for your gold
and get lost in the way, I want you to know:
when you smell the wild rosemary on your way back
it will always guide you, you'll find the right track

**Sleep my little precious, right there beside me, oh I will shelter you
Sleep my little precious, always beside me, this moment is ours, it's blue**

Thank you for being there, before we say good bye
promise me you will find Your Colors of Life
Please make a snow angel on the snowy ground
Together we'll keep you safe and sound

**Sleep my little precious, right there beside me, oh I will shelter you
Sleep my little precious, always beside me, this moment is ours, it's blue**
